Health Ecology brings together a variety of approaches in examining how local, regional and global factors impinge upon the health and environment of individuals, communities and the globe. Abstract: In response to a Congressional call for action, Federal initiatives to improve and expand research, extension and higher education programs in human nutrition, home economics and family life are proposed. Federal commitments to strong human resources-oriented programs in agriculture focus on 4 high-priority problems: family economic stability and security; energy and environment; food, nutrition and health; and family strengths and social environment. An implementation plan for each proposal suggests research and higher education activities, integration arrangements, and 2-, 5- and 10- year targets. Proposed plans are to be conducted cooperatively by the USDA, land-grant universities, and cooperative extension services. The relationship between family needs and the food and agricultural system must be closely examined. Strong research and educational programs need Federal leadership, financial support and concerted effort in order to solve the problems of families in the 1980's. The purpose of the report and repository is to serve as an aid for policy-makers and stakeholders seeking to plan, formulate and implement similar policies. It translates technical, scientific information into an accessible how-to guide to help parents protect children from even the most toxic substances. Lifelong learning can occur both in and out of the classroom, but the most valuable instruction takes place on the job. Remote Workforce Training: Effective Technologies and Strategies investigates methods, techniques, and systems used in employee training programs. The tools and technologies surveyed within these pages will help employers take their workers beyond the transient skill sets offered by university degrees and into a constant state of learning and practice that will enhance both their productivity and technical abilities on a regular basis. In particular, the knowledge offered by this reference book will be of use to educators and students as well as managers, leaders, administrators, and personnel. Follows two Cooperative Extension Educators as they visit two homes and make recommendations for improvements that will create a safer and healthier living environment. Among the dangers discussed are mold, dust mites, allergens, asthma triggers, radon, carbon monoxide, asbestos, lead, pesticides, hazardous household chemicals, unsafe drinking water, and fire and safety hazards. Includes the proceedings of the annual meetings. Recent research suggests that indoor mold poses a widespread and, for some people, serious health threat. Federal agencies engage in a number of activities to address this issue, including conducting or sponsoring research. For example, in 2004 the Inst. of Med. issued a report summarizing the scientific literature on mold, dampness, and human health. In addition, the Federal Interagency Comm. on Indoor Air Quality supports the EPA's indoor air research program. This report deals with the health effects of exposure to indoor mold: (1) the conclusions of recent reviews of the scientific literature; (2) the extent to which federal research addresses data gaps; and (3) the guidance agencies are providing to the general public. Illustrations. Directory is indexed by name (parent and subsidiary), geographic location, Standard Industrial Classification (SIC) Code, and corporate responsibility. Identifies and describes specific government assistance opportunities such as loans, grants, counseling, and procurement contracts available under many agencies and programs. The definitive guide to the secret sauce of improving public and population health Nontraditional collaborations have produced some of the most sweeping, health-improving results in recent memory. But whether it's public/private, cross-discipline, or interagency, the formula for identifying these partnerships -- not to mention making them work -- remains very much in progress. The Practical Playbook II is the first resource to elucidate what works (and what doesn't) when it comes to collaborating for change in and around health. It brings together voices of experience and authority to answer this topic's most challenging questions and provide guideposts for applying what they've learned to today's thorniest problems. Readers will find answers to common and advanced questions around multisector partnerships, including: · Identifying sectors and actors that can help to collaborate to improve health · Best practices for initial engagement · Specifics related to collaborations with government, business, faith communities, and other types of partners · The role of data in establishing and running a partnership · Scaling up to maximize impact and remain sustainable · The role of financing · Implications for policy Written in practical terms that will resonate with readers from any background and sector, The Practical Playbook II is the resource that today's helping professions need -- and a roadmap for the next generation of health-improving partnerships. It is widely acknowledged that there is an urgent need to transform our housing stock to a better energy performance level. However, improving energy performance should not result in a negative impact on the health,

wellbeing and the comfort of building occupants. There are many energy-neutral features that can be incorporated at small or zero cost which have a positive effect on wellbeing. This book aims to outline and discuss these aspects of building design. The issue of health and wellbeing has already entered into design advice for the workplace, where productivity and absenteeism are often used as indicators. This book concentrates on residential buildings, notably mass housing and affordable strategies, for which new, more socially and health-oriented indicators are being developed. Provides practical design guidance based on scientific evidence Explores both physical and psychological wellbeing Focuses on the home and immediate domestic environment Structured in an accessible way for architects and designers.
