**Rising** Jan 12 2021 A Pulitzer Prize Finalist, this powerful elegy for our disappearing coast “captures nature with precise words that almost amount to poetry” (The New York Times). Hailed as “the book on climate change and sea levels that was missing” (Chicago Tribune), *Rising* is both a highly original work of lyric reportage and a haunting meditation on how to let go of the places we love. With every record-breaking hurricane, it grows clearer that

climate change is neither imagined nor distant—and that rising seas are transforming the coastline of the United States in irrevocable ways. In *Rising*, Elizabeth Rush guides readers through these dramatic changes, from the Gulf Coast to Miami, and from New York City to the Bay Area. For many of the plants, animals, and humans in these places, the options are stark: retreat or perish. Rush sheds light on the unfolding crises through firsthand testimonials—a Staten Islander who lost her father during Sandy, the remaining holdouts of a Native American community on a drowning Isle de Jean Charles, a neighborhood in Pensacola settled by escaped slaves hundreds of years ago—woven together with profiles of wildlife biologists, activists, and other members of these vulnerable communities. [Crossing the Quality Chasm](#) Sep 27 2019 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers

have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. *Crossing the Quality Chasm* makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, *Crossing the Quality Chasm* also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

**Conundrum** Apr 26 2022 The great travel writer Jan Morris was born James Morris. James Morris distinguished himself in the British military, became a successful and physically daring reporter, climbed mountains, crossed deserts, and established a reputation as a historian of the British empire. He was happily married, with several children. To all appearances, he was not only a man, but a man's man. Except that appearances, as James Morris had known from early childhood, can be deeply misleading. James Morris had known all his conscious life that at heart he was a woman. *Conundrum*, one of the earliest books to discuss transsexuality with honesty and without prurience, tells the story of James Morris—s hidden life and how he decided to bring it into the open, as he resolved first on a hormone treatment and, second, on risky experimental surgery that would turn him into the woman that he truly was.

**These Precious Days** Jul 06 2020 The beloved New York Times bestselling author reflects on home, family, friendships and writing in this deeply personal collection of essays. "The elegance of Patchett's prose is seductive and inviting: with Patchett as a guide, readers will really get to grips with the power of struggles, failures, and triumphs alike." —Publisher's Weekly "Any story that starts will also end." As a writer, Ann Patchett knows what the outcome of her fiction will be. Life, however, often takes turns we do not see coming. Patchett ponders this truth in these wise essays that afford a

fresh and intimate look into her mind and heart. At the center of *These Precious Days* is the title essay, a surprising and moving meditation on an unexpected friendship that explores "what it means to be seen, to find someone with whom you can be your best and most complete self." When Patchett chose an early galley of actor and producer Tom Hanks' short story collection to read one night before bed, she had no idea that this single choice would be life changing. It would introduce her to a remarkable woman—Tom's brilliant assistant Sooki—with whom she would form a profound bond that held monumental consequences for them both. A literary alchemist, Patchett plumbs the depths of her experiences to create gold: engaging and moving pieces that are both self-portrait and landscape, each vibrant with emotion and rich in insight. Turning her writer's eye on her own experiences, she transforms the private into the universal, providing us all a way to look at our own worlds anew, and reminds how fleeting and enigmatic life can be. From the enchantments of Kate DiCamillo's children's books (author of *The Beatryce Prophecy*) to youthful memories of Paris; the cherished life gifts given by her three fathers to the unexpected influence of Charles Schultz's Snoopy; the expansive vision of Eudora Welty to the importance of knitting, Patchett connects life and art as she illuminates what matters most. Infused with the author's grace, wit, and warmth, the pieces in *These Precious Days* resonate deep in the soul,

leaving an indelible mark—and demonstrate why Ann Patchett is one of the most celebrated writers of our time.

*A Month in the Country* Jun 28 2022 In J. L. Carr's deeply charged poetic novel, Tom Birkin, a veteran of the Great War and a broken marriage, arrives in the remote Yorkshire village of Oxgodby where he is to restore a recently discovered medieval mural in the local church. Living in the bell tower, surrounded by the resplendent countryside of high summer, and laboring each day to uncover an anonymous painter's depiction of the apocalypse, Birkin finds that he himself has

been restored to a new, and hopeful, attachment to life. But summer ends, and with the work done, Birkin must leave. Now, long after, as he reflects on the passage of time and the power of art, he finds in his memories some consolation for all that has been lost.

Sword and Citadel Sep 19 2021 Recently voted the greatest fantasy of all time, after *The Lord of the Rings* and *The Hobbit*, Gene Wolfe's *The Book of the New Sun* is an extraordinary epic, set a million years in the future, on an Earth transformed in mysterious and wondrous ways, in a time when our present culture is no longer even a memory. Severian, the central character, is a torturer, exiled from his guild after falling in love with one of his victims, and journeying to the distant city of Thrax, armed with his ancient executioner's sword, Terminus Est. This edition contains the second two volumes of this four volume novel, *The Sword of the Lictor* and *The Citadel of the Autarch*.

**The American Novel After Ideology, 1961–2000** Aug 07 2020 Claims of ideology's end are, on the one hand, performative denials of ideology's inability to end; while, on the other hand, paradoxically, they also reiterate an idea that 'ending' is simply what all ideologies eventually do. Situating her work around the intersecting publications of Daniel Bell's *The End of Ideology* (1960) and J.D. Salinger's *Franny and Zooey* (1961), Laurie Rodrigues argues that American novels express this paradox through nuanced applications of non-realist strategies, distorting realism in manners

similar to ideology's distortions of reality, history, and belief. Reflecting the astonishing cultural variety of this period, *The American Novel After Ideology, 1961 - 2000* examines Franny and Zooey, Carlene Hatcher Polite's *The Flagellants* (1967), Leslie Marmon Silko's *Almanac of the Dead* (1991), and Philip Roth's *The Human Stain* (2001) alongside the various discussions around ideology with which they intersect. Each novel's plotless narratives, dissolving subjectivities, and cultural codes organize the texts' peculiar relations to the post-ideological age, suggesting an aesthetic return of the repressed.

**Little Book of Circle Processes** Oct 01 2022 Our ancestors gathered around a fire in a circle, families gather around their kitchen tables in circles, and now we are gathering in circles as communities to solve problems. The practice draws on the ancient Native American tradition of a talking piece. Peacemaking Circles are used in neighborhoods to provide support for those harmed by crime and to decide sentences for those who commit crime, in schools to create positive classroom climates and resolve behavior problems, in the workplace to deal with conflict, and in social services to develop more organic support systems for people struggling to get their lives together. A title in *The Little Books of Justice and Peacebuilding Series*.

**The Third Wave** Jun 16 2021 Steve Case, co-founder of America Online (AOL) and one of America's most accomplished entrepreneurs, shares a roadmap for how anyone can succeed in a world of rapidly changing technology. We are entering, he explains, a new paradigm

called the "Third Wave" of the Internet. The first wave saw AOL and other companies lay the foundation for consumers to connect to the Internet. The second wave saw companies like Google and Facebook build on top of the Internet to create search and social networking capabilities, while apps like Snapchat and Instagram leverage the smartphone revolution. Now, Case argues, we're entering the Third Wave: a period in which entrepreneurs will vastly transform major "real world" sectors like health, education, transportation, energy, and food—and in the process change the way we live our daily lives.

**Strangers in Their Own Land** Oct 28 2019 The National Book Award Finalist and New York Times bestseller that became a guide and balm for a country struggling to understand the election of Donald Trump "A generous but disconcerting look at the Tea Party. . . . This is a smart, respectful and compelling book." —Jason DeParle, *The New York Times Book Review* When Donald Trump won the 2016 presidential election, a bewildered nation turned to *Strangers in Their Own Land* to understand what Trump voters were thinking when they cast their ballots. Arlie Hochschild, one of the most influential sociologists of her generation, had spent the preceding five years immersed in the community around Lake Charles, Louisiana, a Tea Party stronghold. As Jedediah Purdy put it in the *New Republic*, "Hochschild is fascinated by how people make sense of their lives. . . . [Her] attentive, detailed

portraits . . . reveal a gulf between Hochschild's 'strangers in their own land' and a new elite." Already a favorite common read book in communities and on campuses across the country and called "humble and important" by David Brooks and "masterly" by Atul Gawande, Hochschild's book has been lauded by Noam Chomsky, New Orleans mayor Mitch Landrieu, and countless others. The paperback edition features a new afterword by the author reflecting on the election of Donald Trump and the other events that have unfolded both in Louisiana and around the country since the hardcover edition was published, and also includes a readers' group guide at the back of the book.

**New from Here** Jun 04 2020 An instant #1 New York Times bestseller! This "timely and compelling" (*Kirkus Reviews*) middle grade novel about courage, hope, and resilience follows an Asian American boy fighting to keep his family together and stand up to racism during the initial outbreak of the coronavirus. Suddenly, Knox has two days to prepare for an international move—and for leaving his dad, who has to stay for work. At his new school in California, Knox struggles with being the new kid. panicking over the loss of health insurance, and Dad doesn't even know when he'll see them again, since the flights have been cancelled. And everyone struggles with Knox's blurting-things-out problem. As racism skyrockets during COVID-19, Knox tries to stand up to hate, while finding his place in his new country. *A New Coast* May 28 2022 More severe storms and rising seas will inexorably push the American coastline inland with profound impact on communities, infrastructure, and natural systems. In *A New Coast*, Jeffrey Peterson presents the science behind predictions for coastal impacts and explains how current policies fall short of what's needed to prepare for these changes. He outlines a framework of bold, new national policies and funding to support local and state governments. Peterson calls for engagement of citizens, the private sector, as well as local and national leaders in a "campaign for a new coast." This is a forward-looking volume offering new insights for policymakers, planners, business leaders preparing for the changes coming to America's coast.

**The Book of Why** Mar 26 2022 A Turing Award-winning computer scientist and statistician shows how understanding causality has revolutionized science and will revolutionize artificial intelligence "Correlation is not causation." This mantra, chanted by scientists for more than a century, has led to a virtual prohibition on causal talk. Today, that taboo is dead. The causal revolution, instigated by Judea Pearl and his colleagues, has cut through a century of confusion and established causality -- the study of cause and effect -- on a firm scientific basis. His work explains how we can know easy things, like whether it was rain or a sprinkler that made a sidewalk wet; and how to answer hard questions, like whether a drug cured an illness. Pearl's work enables us to know not just whether one thing causes another: it lets us explore the world that is and the worlds that could have been. It shows us the essence of human thought and key to artificial intelligence. Anyone who wants to understand either needs *The Book of Why*. *All About Love* Jul 18 2021 A New York Times bestseller and enduring classic, *All About Love* is the acclaimed first volume in feminist icon bell hooks' "Love Song to the Nation" trilogy. *All About Love* reveals what causes a polarized society, and how to heal the divisions that cause suffering. Here is the truth about love, and inspiration to help us instill caring, compassion, and strength in our homes, schools, and workplaces. "The word 'love' is most often defined as a noun, yet we would all

love better if we used it as a verb," writes bell hooks as she comes out fighting and on fire in *All About Love*. Here, at her most provocative and intensely personal, renowned scholar, cultural critic and feminist bell hooks offers a proactive new ethic for a society bereft with lovelessness--not the lack of romance, but the lack of care, compassion, and unity. People are divided, she declares, by society's failure to provide a model for learning to love. As bell hooks uses her incisive mind to explore the question "What is love?" her answers strike at both the mind and heart. Razing the cultural paradigm that the ideal love is infused with sex and desire, she provides a new path to love that is sacred, redemptive, and healing for individuals and for a nation. The *Utne Reader* declared bell hooks one of the "100 Visionaries Who Can Change Your Life." *All About Love* is a powerful, timely affirmation of just how profoundly her revelations can change hearts and minds for the better.

**Waste** Mar 02 2020 The MacArthur grant-winning environmental justice activist's riveting memoir of a life fighting for a cleaner future for America's most vulnerable A Smithsonian Magazine Top Ten Best Science Book of 2020 Catherine Coleman Flowers, a 2020 MacArthur "genius," grew up in Lowndes County, Alabama, a place that's been called "Bloody Lowndes" because of its violent, racist history. Once the epicenter of the voting rights struggle, today it's Ground Zero for a new movement that is also Flowers's life's work—a fight to ensure human dignity through a right most Americans take for granted: basic sanitation. Too many people, especially the rural poor, lack an affordable means of disposing cleanly of the waste from their toilets and, as a consequence, live amid filth. Flowers calls this America's dirty secret. In this "powerful and moving book" (Booklist), she tells the story of systemic class, racial, and geographic prejudice that foster Third World conditions not just in Alabama, but across America, in Appalachia, Central California, coastal Florida, Alaska, the urban Midwest, and on Native American reservations in the West. In this inspiring story of the evolution of an activist, from country girl to student civil rights organizer to environmental justice champion at Bryan Stevenson's Equal Justice Initiative, Flowers shows how sanitation is becoming too

big a problem to ignore as climate change brings sewage to more backyards—not only those of poor minorities.

**More Money Than God** Aug 31 2022 Wealthy, powerful, and potentially dangerous, hedge-fund managers have emerged as the stars of twenty-first century capitalism. Based on unprecedented access to the industry, *More Money Than God* provides the first authoritative history of hedge funds. This is the inside story of their origins in the 1960s and 1970s, their explosive battles with central banks in the 1980s and 1990s, and finally their role in the financial crisis of 2007-9. Hedge funds reward risk takers, so they tend to attract larger-than-life personalities. Jim Simons began life as a code-breaker and mathematician, co-authoring a paper on theoretical geometry that led to breakthroughs in string theory. Ken Griffin started out trading convertible bonds from his Harvard dorm room. Paul Tudor Jones happily declared that a 1929-style crash would be 'total rock-and-roll' for him. Michael Steinhardt was capable of reducing underlings to sobs. 'All I want to do is kill myself,' one said. 'Can I watch?' Steinhardt responded. A saga of riches and rich egos, this is also a history of discovery. Drawing on insights from mathematics, economics and psychology to crack the mysteries of the market, hedge funds have transformed the world, spawning new markets in exotic financial instruments and rewriting the rules of capitalism. And while major banks, brokers, home lenders, insurers

and money market funds failed or were bailed out during the crisis of 2007-9, the hedge-fund industry survived the test, proving that money can be successfully managed without taxpayer safety nets. Anybody pondering fixes to the financial system could usefully start here: the future of finance lies in the history of hedge funds.

**A Whole New Mind** Apr 02 2020 New York Times Bestseller An exciting--and encouraging--exploration of creativity from the author of *When: The Scientific Secrets of Perfect Timing* The future belongs to a different kind of person with a different kind of mind: artists, inventors, storytellers-creative and holistic "right-brain" thinkers whose abilities mark the fault line between who gets ahead and who doesn't. Think Again May 16 2021 #1 New York Times Bestseller "THIS. This is the right book for right now. Yes, learning requires focus. But, unlearning and relearning requires much more—it requires choosing courage over comfort. In *Think Again*, Adam Grant weaves together research and storytelling to help us build the intellectual and emotional muscle we need to stay curious enough about the world to actually change it. I've never felt so hopeful about what I don't know." —Brené Brown, Ph.D., #1 New York Times bestselling author of *Dare to Lead* The bestselling author of *Give and Take* and *Originals* examines the critical art of rethinking: learning to question your opinions and open other people's minds, which can position you for excellence at work and wisdom in life Intelligence is usually seen as the ability to think and learn, but in a rapidly changing world, there's another set of cognitive skills that might matter more: the ability to rethink and unlearn. In our daily lives, too many of us favor the comfort of conviction over the discomfort of doubt. We listen to opinions that make us feel good, instead of ideas that make us think hard. We see disagreement as a threat to our egos, rather than an opportunity to learn. We surround ourselves with people who agree with our conclusions, when we should be gravitating toward those who challenge our thought process. The result is that our beliefs get brittle long before our bones. We think too much like preachers defending our sacred beliefs, prosecutors proving the other side

wrong, and politicians campaigning for approval--and too little like scientists searching for truth. Intelligence is no cure, and it can even be a curse: being good at thinking can make us worse at rethinking. The brighter we are, the blinder to our own limitations we can become. Organizational psychologist Adam Grant is an expert on opening other people's minds--and our own. As Wharton's top-rated professor and the bestselling author of *Originals* and *Give and Take*, he makes it one of his guiding principles to argue like he's right but listen like he's wrong. With bold ideas and rigorous evidence, he investigates how we can embrace the joy of being wrong, bring nuance to charged conversations, and build schools, workplaces, and communities of lifelong learners. You'll learn how an international debate champion wins arguments, a Black musician persuades white supremacists to abandon hate, a vaccine whisperer convinces concerned parents to immunize their children, and Adam has coaxed Yankees fans to root for the Red Sox. *Think Again* reveals that we don't have to believe everything we think or internalize everything we feel. It's an invitation to let go of views that are no longer serving us well and prize mental flexibility over foolish consistency. If knowledge is power, knowing what we don't know is wisdom.

*A Little Book for New Theologians* Dec 03 2022 In this quick and vibrant little book, Kelly Kapic presents the nature, method and manners of theological study for newcomers to the field. He

emphasizes that theology is more than a school of thought about God, but an endeavor that affects who we are. "Theology is about life," writes Kapic. "It is not a conversation our souls can afford to avoid."
