The astonishing, uplifting story of a real-life Indiana Jones and his humanitarian campaign to use education to combat terrorism in the Taliban's backyard Anyone who despairs of the individual's power to change lives has to read the story of Greg Mortenson, a homeless mountaineer who, following a 1993 climb of Pakistan's treacherous K2, was inspired by a chance encounter with impoverished mountain villagers and promised to build them a school. Over the next decade he built fifty-five schools—especially for girls—that offer a balanced education in one of the most isolated and dangerous regions on earth. As it chronicles Mortenson's quest, which has brought him into conflict with both enraged Islamists and uncomprehending Americans, *Three Cups of Tea* combines adventure with a celebration of the humanitarian spirit. Racism and imperialism are the twin forces that propelled the course of the United States in the world in the early twentieth century and in turn affected the way that diplomatic history and international relations were taught and understood in the American academy. Evolutionary theory, social Darwinism, and racial anthropology had been dominant doctrines in international relations from its beginnings; racist attitudes informed research priorities and were embedded in newly formed professional organizations. In *White World Order, Black Power Politics*, Robert Vitalis recovers the arguments, texts, and institution building of an extraordinary group of professors at Howard University, including Alain Locke, Ralph Bunche, Rayford Logan, Eric Williams, and Merze Tate, who was the first black female professor of political science in the country. Within the rigidly segregated profession, the "Howard School of International Relations" represented the most important center of opposition to racism and the focal point for theorizing feasible alternatives to dependency and domination for

Africans and African Americans through the early 1960s. Vitalis pairs the contributions of white and black scholars to reconstitute forgotten historical dialogues and show the critical role played by race in the formation of international relations. This text presents examples of residential lofts in London, New York, Paris, Chicago, Berlin, Los Angeles and Milan. Here are lofts with open, free-flowing spaces, loft divided into rooms or arranged on different levels, artist's lofts, and lofts that function as home offices. This book focuses on the process of arbitration between States and private persons. As scholars and citizens, we are predisposed to think of war as a profoundly destructive activity that ideally should be abolished altogether. Yet before the twentieth century, war was widely understood as a productive force in human affairs that should be harnessed for the purposes of creating peace and order. Analyzing how the concept of war has been used in different contexts from the seventeenth to the late nineteenth century, Jens Bartelson addresses this transition by inquiring into the underlying and often unspoken assumptions about the nature of war, and how these have shaped our understanding of the modern political world and the role of war within it. He explores its functions in the process of state making and in the creation of the modern international system to bring the argument up to date to the present day, where war is now on the centre stage of world politics. A compelling new look at the role of today's international courts In 1989, when the Cold War ended, there were six permanent international courts. Today there are more than two dozen that have collectively issued over thirty-seven thousand binding legal rulings. The New Terrain of International Law charts the developments and trends in the creation and role of international courts, and explains how the delegation of authority to international judicial institutions influences global and domestic politics. The New Terrain of International Law presents an in-depth look at the scope and powers of international courts operating around the world. Focusing on dispute resolution, enforcement, administrative review, and constitutional review, Karen Alter argues that international courts alter politics by providing legal, symbolic, and leverage resources that shift the political balance in favor of domestic and international actors who prefer policies more consistent with international law objectives. International courts name violations of the law and perhaps specify remedies. Alter explains how this limited power--the power to speak the law--translates into political influence, and she considers eighteen case studies, showing how international courts change state behavior. The case studies, spanning issue areas and regions of the world, collectively elucidate the political factors that often intervene to limit whether or not international courts are invoked and whether international judges dare to demand significant changes in state practices. Written by one of the world's pioneers and leading authorities on international criminal law, this text book covers the history, nature, and sources of international criminal law; the *ratione personae*; *ratione materiae*--sources of substantive international criminal law; the indirect enforcement system; the direct enforcement system; the function of the international criminal court; rules of procedure and evidence applicable to international criminal proceedings; and the future of international criminal law. This textbook is fully updated, comprehensive, easy to read, and ideally suited for classroom use. Also available as hardback: isbn 9789004264977 Since the end of the Cold War, U.S. officials have been more willing to remind allies that the

United States will not play the role of international policeman. Given U.S. reluctance, the job of peacekeeping will fall increasingly to international organizations and regional alliances. In *International Peacekeeping* Paul Diehl examines the recent record of United Nations peacekeeping forces and develops criteria for assessing their operations. His analysis provides useful guidance for the management of new hostilities in areas such as Central and Eastern Europe, where the dissolution of the Soviet Union has spawned bitter civil wars and dangerous border disputes. Diehl identifies three sets of factors that affect traditional international peacekeeping operations. He begins by discussing the practical concerns of peacekeeping efforts, such as force composition, organization, and deployment. He then examines issues related to the political and military context in which the forces are deployed, including the nature of the conflict and the involvement of third parties. Finally, he considers the authorization by the relevant international body - usually the United Nations - as it relates to the mission's mandate, policies, and financing. He concludes by analyzing the viability of new roles for U.N. peacekeeping troops, such as humanitarian assistance, and by exploring structural alternatives to U.N. peacekeeping operations.

Around the world, discriminatory legislation prevents women from accessing their human rights. It can affect almost every aspect of a woman's life, including the right to choose a partner, inherit property, hold a job, and obtain child custody. Often referred to as family law, these laws have contributed to discrimination and to the justification of gender-based violence globally. This book demonstrates how women across the world are contributing to legal reform, helping to shape non-discriminatory policies and to counter current legal and social justifications for gender-based violence. The book takes case studies from Brazil, India, Iran, Lebanon, Nigeria, Palestine, Senegal, and Turkey, using them to demonstrate in each case the varied history of family law and the wide variety of issues impacting women's equality in legislation. Interviews with prominent women's rights activists in three additional countries are also included, giving personal accounts of the successes and failures of past reform efforts. Overall, the book provides a complex global picture of current trends and strategies in the fight for a more egalitarian society. These findings come at a critical moment for change. Across the globe, family law issues are contentious. We are simultaneously witnessing an increased demand for women's equality and the resurgence of fundamentalist forces that impede reform, invoking rules rooted in tradition, culture, and interpretations of religious texts. The outcome of these disputes has enormous ramifications for women's roles in the family and society. This book tackles these complexities head on, and will interest activists, practitioners, students, and scholars working on women's rights and gender-based violence. This book was written as a dissertation for the Doctorate of Laws, University of Amsterdam. I am most grateful, first of all, to Professor A. J. P. Tammes, who acted as Promotor. Throughout my working at this study he managed to afford at the same time guidance, inspiration, and complete freedom. I have also benefited much from the suggestions and advice of Dr. Th. e. van Boven of the Dutch Ministry of Foreign Affairs, Member of the U.N. Commission on Human Rights, who was a very helpful Co referent. In earlier stages of the work, the critical remarks by Mr. S. A. Kuipers, Dr. H. Meijers and Miss J. M. van Wouw were of great importance to me. So was the experience of participating in the program of graduate studies of the Columbia University School of Law, in 1968- 1969. I owe gratitude to the Amsterdam Law Faculty for having offered this opportunity to me. I am indebted to Miss Sinja Alma for her transforming a chaotic manuscript into a neat typescript in a most capable and patient manner; to Miss E. D. J. Jongens for her assistance in sorting out the United Nations documentation; and to Howard S. Gold (Gersono vitch), who was so kind as to correct the faults in my English. Since I went on tinkering with the text I am to blame for all linguistic errors in it. The research for this study was concluded in October, 1972.

"If one organization is synonymous with keeping hope alive, even as a faint glimmer in the darkness of a prison, it is Amnesty International. Amnesty has been the light, and that light was truth—bearing witness to suffering hidden from the eyes of the world."—from *Keepers of the Flame*

The first in-depth look at working life inside a major human rights organization, *Keepers of the Flame* charts the history of Amnesty International and the development of its nerve center, the International Secretariat, over forty-five years. Through interviews with staff members, archival research, and unprecedented access to Amnesty International's internal meetings, Stephen Hopgood provides an engrossing and enlightening account of day-to-day operations within the organization, larger decisions about the nature of its mission, and struggles over the implementation of that mission. An enduring feature of Amnesty's inner life, Hopgood finds, has been a recurrent struggle between the "keepers of the flame" who seek to preserve Amnesty's accumulated store of moral authority and reformers who hope to change, modernize, and use that moral authority in ways that its protectors fear may erode the organization's uniqueness. He also explores how this concept of moral authority affects the working lives of the servants of such an ideal and the ways in which it can undermine an institution's political authority over time. Hopgood argues that human-rights activism is a social practice best understood as a secular religion where internal conflict between sacred and profane—the mission and the practicalities of everyday operations—are both unavoidable and necessary. *Keepers of the Flame* is vital reading for anyone interested in Amnesty International, its accomplishments, agonies, obligations, fears, opportunities, and challenges—or, more broadly, in how humanitarian organizations accommodate the moral passions that energize volunteers and professional staff alike.

A visual feast--the most stunning and creative residential lofts, from the cozily traditional to the rigorously avant-garde, from New York to Milan, L.A. to Berlin. More than 370 full-color photographs; 15 architectural drawings. The third edition of this concise book is mainly intended to be used as an introduction to the rules of private international law belonging to the legal system of the European Union. It provides legal practitioners with an overview of this highly complex field of law and can serve as an introductory textbook in elective undergraduate courses and master programs offered by many law schools, both to their own students and to exchange students from other countries. The book will also be useful as a springboard towards more profound studies of statutory texts, case law, and legal literature. Grounded in a critical sociocultural approach, this volume examines issues associated with teaching and learning difficult histories in international contexts. Defined as representations of past violence and oppression, difficult histories are contested and can evoke emotional, often painful, responses in the present. Teaching and learning these histories is contentious yet necessary for increased dialogue within conflict-ridden societies, reconciliation in post-conflict societies, and greater social cohesion in long-standing democratic nations. Focusing on locations and populations across the globe, chapter authors investigate how key themes--including culture, identity, collective memory, emotion, and multi-perspectivity, historical consciousness, distance, and amnesia--inform the teaching and learning of difficult histories. Recently the topic of civil society has generated a wave of interest, and a wealth of new information. Until now no publication has attempted to organize and consolidate this knowledge. The *International Encyclopedia of Civil Society* fills this gap, establishing a common set of understandings and terminology, and an analytical starting point for future research. Global in scope and authoritative in content, the Encyclopedia offers succinct summaries of core concepts and theories; definitions of terms; biographical entries on important figures and organizational profiles. In addition, it serves as a reliable and up-to-date guide to additional sources of information. In sum, the Encyclopedia provides an overview of the contours of civil society, social capital, philanthropy and nonprofits across cultures and historical periods. For researchers in nonprofit and civil society studies, political science, economics, management and social enterprise, this is the most systematic appraisal of a rapidly growing field. First Published in 2001. Routledge is an imprint of Taylor & Francis, an informa company. Hailed as a "pithy and compelling account of an intensely relevant topic" (Kirkus Reviews), this wide-ranging volume offers a superb account of a key moment in modern U.S. and world history. Drawing upon the latest research in archives in China, Russia, and Vietnam, Mark Lawrence creates an extraordinary, panoramic view of all sides of the war. His narrative begins well before American forces set foot in Vietnam, delving into French colonialism's contribution to the 1945 Vietnamese revolution, and

revealing how the Cold War concerns of the 1950s led the United States to back the French. The heart of the book covers the "American war," ranging from the overthrow of Ngo Dinh Diem and the impact of the Tet Offensive to Nixon's expansion of the war into Cambodia and Laos, and the final peace agreement of 1973. Finally, Lawrence examines the aftermath of the war, from the momentous liberalization--"Doi Moi"--in Vietnam to the enduring legacy of this infamous war in American books, films, and political debate. Suicide remains one of the most pressing public health concerns across the world. Expensive in terms of the human cost and associated suffering, the economic costs, the social costs and the spiritual costs, it affects millions of people every year. This important reference work collects together a wide range of research around suicide and suicide prevention, in order to guide future research and provide guidance for professionals about the best way to respond meaningfully to suicidal patients. Responding to the need for multi-disciplinary and international research to deepen our understanding of suicide, it demonstrates where our knowledge is firmly evidence-based and where new areas for research are emerging, as well as highlighting where we know little. Divided into six parts, each with its own editorial introduction and commentary, it explores research with and about survivors of suicide and indigenous populations. The remaining sections look at suicide-focused research in psychiatric nursing, psychiatry, psychology, and social work and allied health. It is of interest to all advanced students, practitioners and scholars interested in suicide and its impact and prevention. This book explores the increasing concern over the extent to which those suffering from forced cross-border displacement as a result of environmental change are protected under international human rights law. Formally they are not entitled to admission or stay in a third state country, a situation that has been identified as an international "legal protection gap". The book seeks to provide answers to two basic questions: whether and to what extent existing international law protects cross-border environmental displacement, and whether and how existing formalized regional complementary protection standards can interpretively solidify and conceptualize protection for cross-border environmental displacement. The discussion outlines that the protection of the human person is not only an ex post facto obligation of states, but must be increasingly seen as an ex ante one. The analysis further suggests that the European Union regionally orientated protection regime can help states to consolidate an evolving protection paradigm of proactive and reactive measures being erected at the international level. It can also narrow the identified legal protection gaps. In so doing, it helps states to reconceptualise protection as a holistic and dynamic enterprise. This book will be of great interest to academics in law, political science and human rights, policy makers and civil society organisations both at national and international level. Why should sovereign states obey international law? In this groundbreaking study Fernando Tesón argues that an overlapping respect for human rights has created a moral common ground among the countries of the world. It is this common set of values rather than self-interest that ultimately provides legitimacy to international law. Using the tools of moral philosophy Tesón analyzes the concepts of sovereignty, intervention, and national interest; the contributions of social contract theory, game theory, and feminist theory; and the puzzles of self-determination and group rights. The second edition of International Marketing serves as a textbook for an introductory course on international marketing. This widely used textbook continues to provide students with an introduction to International Organisations, exploring their rise, their development in the 20th century and accounting for their significance in the modern international political and economic system. The third edition: has been fully revised and updated continues to offer a unique concise, yet comprehensive, approach, giving students an accessible and manageable introduction to this core part of International Relations offers authoritative guides to further reading. Originally published in 1992. In an increasingly competitive climate, well-trained, experienced management is vital for establishing the long term future of industry. In response to this need, the number of management training courses have been growing in recent years. However, there is a group of highly skilled professionals who are not always recognized for their management potential. Engineers, often viewed as nothing more than technicians, are a valuable but neglected human resource. Their expertise has helped to generate the recent organizational restructuring throughout the manufacturing industry. This study compares the situation of engineers in Britain with those in other countries. It analyzes the industrial cultures of countries that have developed along very different traditions such as Japan, Germany and Hungary as well as countries like Canada and the US where British traditions have prevailed but where the outcomes are different. Bringing together leading writers on management who have specialist knowledge of the engineering profession, it covers such issues as education, employment and labour relations to show how far engineers are undervalued in British culture. This book should be of interest to undergraduates, MBA students, academics and researchers in management, engineering, new technology, industrial sociology and organizational behaviour.
