*Multinationals in their Communities Apr 26 2022*

Multinationals can impact significantly on the quality of social relations within their communities, partly through corporate citizenship projects. This book analyzes the nature and effectiveness of these projects, using theoretical and empirical insights of recent literature. It demonstrates how MNCs can build communities in developing countries.

**The Evolution of Audit Thought and Practice**

Dec 11 2020 This book, first published in 1988, analyses the history of auditing with as much objectivity as possible. These chapters reveal the importance of auditing in society generally and business activity particularly. The character of the auditor is examined, and their part in history as their role developed from an amateur status to a professional one. The development of the accounting profession is a significant part of the history of auditing. The emerging professional bodies assumed a societal role and by doing so, the audit function changed in terms of its aims and practices, and became a matter of public as well as private concern.

### **Studies in the History of Tax Law, Volume 9**

Jan 30 2020 These are the papers from the ninth Cambridge Tax Law History Conference, held in July 2018. In the usual manner, these papers have been selected from an oversupply of proposals for their interest and relevance, and scrutinised and edited to the highest standard for inclusion in this prestigious series. The papers fall within five basic themes. Four papers focus on tax theory: Bentham; social contract and tax governance; Schumpeter's 'thunder of history'; and the resurgence of the benefits theory. Three involve the history of UK specific interpretational issues: management expenses; anti-avoidance jurisprudence; and identification of professionals. A further three concern specific forms of UK tax on road travel, land and capital gains. One paper considers the formation of HMRC and another explains aspects of nineteenth-century taxation by reference to Jane Austen characters. Four consider aspects of international taxation: development of EU corporate tax policy; history of Dutch tax planning; the important 1942 Canada-US tax treaty; and the 1928 UN model tax treaties on tax evasion. Also included are papers on the effects of WWI on New Zealand income tax and development of anti-tax avoidance rules in China.

### **The Oxford Handbook of the Corporation**

Jun 28 2022 The Oxford Handbook of the Corporation assesses the contemporary relevance, purpose, and performance of the corporation. The corporation is one of the most significant, if contested, innovations in human history, and the direction and effectiveness of corporate law, corporate governance, and corporate performance are being challenged as never before. Continuously evolving, the corporation as the primary instrument for wealth generation in contemporary economies demands

frequent assessment and reinterpretation. The focus of this work is the transformative impact of innovation and change upon corporate structure, purpose, and operation. Corporate innovation is at the heart of the value-creation process in increasingly internationalized and competitive market economies, and corporations today are embedded in a world of complex global supply chains and rising state and state-directed capitalism. In questioning the fundamental purpose and performance of the corporation, this Handbook continues a tradition commenced by Berle and Means, and contributed to by generations of business scholars. What is the corporation and what is it becoming? How do we define its form and purpose and how are these changing? To whom is the corporation responsible, and who should judge the ultimate performance of corporations? By investigating the origins, development, strategies, and theories of corporations, this volume addresses such questions to provide a richer theoretical account of the corporation and its contested future.

**Clouds** Dec 31 2019 An eloquent and timely plea for understanding refugees. Why are young people leaving their country to walk to the United States to seek a new, safe home? Over 100,000 such children have left Central America. This book of poetry helps us to understand why and what it is like to be them. This powerful book by award-winning Salvadoran poet Jorge Argueta describes the terrible process that leads young people to undertake the extreme hardships and risks involved in the journey to what they hope will be a new life of safety and opportunity. A refugee from El Salvador's war in the eighties, Argueta was born to explain the tragic choice confronting young Central Americans today who are saying goodbye to everything they know because they fear for their

lives. This book brings home their situation and will help young people who are living in safety to understand those who are not. Compelling, timely and eloquent, this book is beautifully illustrated by master artist Alfonso Ruano who also illustrated *The Composition*, considered one of the 100 Greatest Books for Kids by Scholastic's Parent and Child Magazine. Correlates to the Common Core State Standards in English Language Arts: CCSS.ELA-LITERACY.RL.2.1 Ask and answer such questions as who, what, where, when, why, and how to demonstrate understanding of key details in a text. *Made in China* Jul 06 2020 A February Indie Next Pick, A New York Times Book Review Editors' Choice, A Newsweek & Refinery 29 Most Anticipated Book of 2021, A Finalist for the 2019 J. Anthony Lukas Work-in-Progress Award, In 2012, when Julie Keith opened a package of Halloween decorations she had purchased at a big box store near her home in Oregon, something shocking fell out: an SOS letter, handwritten in broken English by the prisoner who had made and packaged the items. The letter's author, Sun Yi, was a Chinese engineer turned political prisoner, an ordinary citizen forced into grueling labor for campaigning for the freedom to join a forbidden meditation movement. He was imprisoned alongside petty criminals, civil rights activists, and tens of thousands of others the Chinese government had decided to "reeducate," carving foam gravestones and stitching clothing for more than fifteen hours a day. In this page-turning and urgent book, investigative journalist Amelia Pang pulls back the curtain on the human cost of the cheap consumer products Americans take for granted. She goes deep inside a closely guarded network of laogai-forced labor camps to tell the stories of men and women like Sun, as well as members of the persecuted Uyghur minority group, whose abuse and mass internment have provoked international outcry. Impeccably researched and bravely reported, *Made in China* is ultimately a call to action, urging us to think more critically about and demand more answers from the companies we patronize. **Critique, Social Media and the Information Society** Oct 01 2022 In times of global capitalist crisis we are witnessing a return of critique in the form of a surging interest in critical theories (such as the critical political economy of Karl Marx) and social rebellions as a reaction to the commodification and instrumentalization of everything. On one hand, there are overdrawn claims that social media (Twitter, Facebook, YouTube, etc) have caused uproars in countries like Tunisia and Egypt. On the other hand, the question arises as to what actual role social media play in contemporary capitalism, crisis, rebellions, the strengthening of the commons, and the potential creation of participatory democracy. The commodification of everything has resulted also in a commodification of the communication commons, including Internet communication that is today largely commercial in character. This book deals with the questions of what kind of society and what kind of Internet are desirable, how capitalism, power structures and social media are connected, how political struggles are connected to social media, what current developments of the Internet and society tell us about potential futures, how an alternative Internet can look like, and how a participatory, commons-based Internet and a co-operative, participatory, sustainable information society can be achieved.

**Transparency in International Law** Aug 31 2022 While its importance in domestic law has long been acknowledged, transparency has until now remained largely unexplored in international law. This study of transparency issues in key areas such as international economic law, environmental law, human rights law and humanitarian law brings together new and important insights on this pressing issue. Contributors explore the framing and content of transparency in their respective fields with regard to proceedings, institutions, law-making processes and legal culture, and a selection of cross-cutting essays completes the study by examining transparency in international law-making and adjudication.

LCA of an ecolabeled notebook : consideration of social and environmental impacts along the entire life cycle Jan 04 2023 This study

investigates social and environmental impacts caused by an ecolabeled notebook along its entire life cycle. In order to analyse the diverse effects of the laptop, a social life cycle assessment and an environmental life cycle assessment were performed in parallel. Both assessments together provide a holistic overview of positive and negative impacts in regard to social and environmental sustainability. This book contains the complete final report written by GreenDeltaTC on behalf of the Belgian Federal Public Planning Service Sustainable Development. It comprises the methodological background, the social inventory, process modifications with regard to the environmental inventory, and detailed results of the impact assessment phase. Further, a newly developed social impact assessment method is presented and applied. In addition, recommendations on company and policy level were derived.

**The Story of Stuff** Jul 30 2022 A classic exposé in company with *An Inconvenient Truth* and *Silent Spring*, *The Story of Stuff* expands on the celebrated documentary exploring the threat of overconsumption on the environment, economy, and our health. Leonard examines the "stuff" we use everyday, offering a galvanizing critique and steps for a changed planet. *The Story of Stuff* was received with widespread enthusiasm in hardcover, by everyone from Stephen Colbert to Tavis Smiley to George Stephanopolous on *Good Morning America*, as well as far-reaching print and blog coverage. Uncovering and communicating a critically important idea—that there is an intentional system behind our patterns of consumption and disposal—Annie Leonard transforms how we think about our lives and our relationship to the planet. From sneaking into factories and dumps around the world to visiting textile workers in Haiti and

children mining coltan for cell phones in the Congo, Leonard, named one of Time magazine's 100 environmental heroes of 2009, highlights each step of the materials economy and its actual effect on the earth and the people who live near sites like these. With curiosity, compassion, and humor, Leonard shares concrete steps for taking action at the individual and political level that will bring about sustainability, community health, and economic justice. Embraced by teachers, parents, churches, community centers, activists, and everyday readers, *The Story of Stuff* will be a long-lived classic.

### **Corporate Social Responsibility in der Supply Chain in China** Dec 23 2021

Inhaltsangabe: Einleitung: Bill Gates sagte einmal: I think it's fair to say that personal computers have become the most empowering tools we've ever created. They're tools of communication, they're tools of creativity, and they can be shaped by their user. So ist der Computer heutzutage kaum mehr aus dem Lebensalltag wegzudenken und wird zunehmend mit Hilfe des Internet zur weltweiten Kommunikation oder Informationsdarbietung verwendet. Der Computer steht zum Einen für die schnelle Kommunikation und globale Vernetzung, auf der anderen Seite ist er symbolisch für die Globalisierung. Die Elektronikindustrie, worunter die Produktion von Computern fällt, ist die größte und am schnellsten wachsende Industrie. Die Herstellung eines Computers umfasst im Gegensatz zu früher eine Vielzahl von Produktionsschritten, die über die ganze Welt verteilt sind. So beziehen große Computerunternehmen die Bauteile und Komponenten für den Computer von einem Netzwerk aus Zuliefererunternehmen, ihrer Supply Chain, aus Niedriglohnländern wie China, Taiwan und Mexiko und spezialisieren sich selbst auf das Design und die Entwicklung. Neben der Globalisierung der Produktion und der damit auftauchenden Probleme, bleiben aber auch die großen Aufgabenstellungen der Zeit, wie die globale Erwärmung und die Endlichkeit von Ressourcen bestehen. Damit entsteht die Anforderung für Unternehmen verantwortungsvoll zu handeln. Corporate Social Responsibility (CSR) steht für die

gesellschaftliche Verantwortung von Unternehmen, die die Gesellschaft, Organisationen und Konsumenten zunehmend einfordern und sich mittlerweile zu einem sehr bekannten Geschäftskonzept entwickelt hat. Anders als beispielsweise in der Textil- und Sportartikelindustrie, die durch die sogenannten Sweatshops in Entwicklungsländern in öffentliche Kritik geraten sind, schien die Elektronikindustrie bis vor wenigen Jahren als sauber zu gelten, da es nur wenig Informationen über ökologische und soziale Missstände in der Zulieferkette gab. Dies änderte sich 2004, als erste Kampagnen und Initiativen die Arbeitsbedingungen in den Zuliefererbetrieben offen legten und somit als High-Tech Sweatshops für öffentliche Empörung sorgten. Aber was genau bedeutet gesellschaftliches Handeln für Unternehmen in der Zulieferkette? Wie kann CSR effizient umgesetzt werden? Handeln die Unternehmen so, wie sie es in ihren umfassenden Nachhaltigkeitsberichten darstellen? Die vorliegende Arbeit soll diese Fragen beantworten. Dazu [...]

*The Face That Changed It All* Sep 07 2020 In her revelatory and redemptive memoir, Beverly Johnson, the first African American supermodel to grace the cover of *Vogue*, recounts her career in her own passionate and deeply honest voice. She chronicles her childhood as a studious, and sometimes bullied, bookworm during the sixties. She left college to pursue modeling and a

successful three-decade career followed. Amid glamorous tales of the hard partying of the 1970s and Hollywood during the eighties, she details her many encounters and friendships with the likes of Jackie Kennedy, Halston, Calvin Klein, Andy Warhol, Elizabeth Taylor, Michael Jackson, Eddie Murphy, Jack Nicholson, Keith Richards, and Warren Beatty. But she also reveals the demons she wrestled with--her struggles with racism, drug addiction, and an abusive marriage followed by divorce proceedings which tested her fortitude and sanity. She shares for the first time intimate details surrounding her love affair with the late tennis icon Arthur Ashe, and pays homage to her mentor, the late Naomi Sims, while lifting the veil off the complicated and often tense relationships among models. Familiar names from the catwalk, such as Pat Cleveland and Iman, illustrate how each had to fight not just the system, but each other, in order to survive. More than five hundred magazine covers later, Johnson is now a successful businesswoman, actress, women's advocate, and philanthropist. This no-holds-barred look at the lives of the rich, fabulous, and famous is also a story of failure and success in the upper echelons of the fashion world, and how Beverly Johnson emerged from her struggles smarter, happier, and stronger than ever.--Adapted from book jacket.

From Corporate to Social Media Dec 03 2022  
The corporate and the social are crucial themes of our times. In the first decade of the twenty-first century, both individual lives and society were shaped by capitalist crisis and the rise of social media. But what marks the distinctively social character of "social media"? And how does it relate to the wider social and economic context of contemporary capitalism? The concept of Corporate Social Responsibility (CSR) is based on the idea that a socially responsible capitalism is possible; this suggests that capitalist media corporations can not only enable social interaction and cooperation but

also be socially responsible. This book provides a critical and provocative perspective on Corporate Social Responsibility (CSR) in media and communication industries. It examines both the academic discourse on CSR and actual corporate practices in the media sector, offering a double critique that reveals contradictions between corporate interests and social responsibilities. Marisol Sandoval's political economic analysis of Apple, AT&T, Google, HP, Microsoft, News Corp, The Walt Disney Company and Vivendi shows that media and communication in the twenty-first century are confronted with fundamental social responsibility challenges. From software patents and intellectual property rights to privacy on the Internet, from working conditions in electronics manufacturing to hidden flows of eWaste - this book encourages the reader to explore the multifaceted social (ir)responsibilities that shape commercial media landscapes today. It makes a compelling argument for thinking beyond the corporate in order to envision and bring about truly social media. It will interest students and scholars of media studies, cultural industry studies, sociology, information society studies, organization studies, political economy, business and management.
