Paul Murphy Mar 27 2022 Born into a traditional Welsh valley community, Paul Murphy has been a member of the Labour Party for more than 55 years. In this book, he describes how the socialist beliefs of that community, and of his parents especially, helped to develop his own very early political consciousness. After three years studying at Oxford, and alongside work as a lecturer in History and Government, he went on to serve on his local council before succeeding Leo Abse in 1987 as MP for his home constituency Torfaen. His time in government from 1997 onwards included seven years as Secretary of State for Wales and for Northern Ireland, in the Cabinets of Tony Blair and Gordon Brown, and the book provides unique insights into Murphy's leading role at times of major constitutional change, including the pivotal part he played as Northern Ireland Minister under Mo Mowlam in negotiating the Good Friday Agreement.

The Man from the Alamo Jan 01 2020 John Rees, soldier and freedom fighter, was a shadowy figure who surfaced during two crucial nineteenth-century revolts and then disappeared from history. For the first time, author John Humphries reveals the fate of the man, first mentioned as a member of the New Orleans Greys, who fought for Texan Independence at the Alamo and narrowly escaped execution at the Goliad Mission. Later, Rees was one of the main agitators in the doomed Welsh Chartist movement. Twenty-two men died during the Chartist attack upon the Westgate Hotel when a detachment from the 45th Regiment of Foot, hidden behind the hotel's shuttered windows, discharged their muskets into the crowd. For waging war

against the monarch, thirteen of the Chartist leaders were indicted for high treason in the last great show trial in British legal history, while Rees escaped back to the American West. Rees' spectacular journey from the bloodied sands of Texas to the last armed uprising on British soil is only one of the stories told in this book.

Limestones and Caves of Wales Oct 22 2021 This 1989 book covers the geology and geomorphology of the Carboniferous Limestone areas of Wales, and summarises the state of knowledge of the main cave systems including the longest and deepest in Britain. It sets out to assess the morphological evolution of the cave systems and the associated landscape features, particularly in light of the effects of successive glaciations. The book also covers related subjects including the biology of the cave faunas, important archaeological discoveries in Welsh caves and the hydrology of the limestone masses. On its publication, this was the first book to give a general survey of the subject. It will continue to provide a valuable reference for cavers and also for geologists, geographers,

biologists and archaeologists with special
interests in the area.
