One-third of the U.S. gross domestic product flows through franchises, and one out of every sixteen workers is employed by one. But how did franchising come to play such a dominant role in the American economy? What are the day-to-day experiences of franchisees and franchisers in the workplace? What challenges and pitfalls await them as they stake their claim to prosperity? These are just a few of the questions explored in Franchising Dreams, a documentary-like look into the frustrations and uncertainties that entrepreneurs face in their pursuit of the American dream. Peter M. Birkeland worked for three years in the front-line operations of franchise units for three companies, met with CEOs and executives, and attended countless trade shows, seminars, and expositions. All this firsthand experience gave him unprecedented access to the hopes and aspirations of franchisees. His book closely traces different franchisees and follows them as their dreams of wealth and independence buckle beneath the weight of frustrating logistics and contractual technicalities. Through extensive interviews and research, Birkeland not only discovers what makes franchisees succeed or fail, he uncovers the difficulties in running a business according to someone else's system and values. Bearing witness to a market flooded with fierce competitors and dependent on the inscrutable whims of consumers, he uncovers the numerous challenges that franchisees face in making their businesses succeed. With the main emphasis on technical manuals the book is primarily targeted at those who have a special interest in the design and use of utility texts and how these texts are received and understood by a multifaceted audience. Accessibility is not a new research area and many explanations have been offered over the past years as to why non-experts often have difficulties in comprehending texts written by technological experts. This book offers a new approach to accessibility studies by exploring not only style, but also attitudes to style, by asking text consumers which style they prefer for different parts of the manual. A key role is played by the Systemic Functional Linguistics' notion of grammatical metaphor, a stylistic choice that is commonly used in technical literature. Grammatical metaphor although apparently obstructing the comprehension process of some readers is a common element in the preferred style that separates the insiders from the outsiders . An explanation of this rather surprising result is offered by resorting to Critical Discourse Analysis. Prevention is the first line of defence in the fight against infection. Talking about Literacy re-examines dominant notions of what literacy is, and challenges the problem-solution reflex to the issue (the problem is illiteracy: the solution is more literacy). Literacy has enormous emotional and political associations, and the job of literacy educator often concerns changing attitudes and challenging prejudices - whether in the form of publicity strategies, counselling new students, or in curriculum design. In short, adult literacy education means not only teaching courses like 'fresh start', 'basic skills', 'study skills', 'communication skills', 'language support' and 'return to study', but also designing strategies to encourage people to see that these courses may meet their own interests - and educating them and others to rethink their own negative attitudes to 'illiteracy'. The book looks in detail in at five principles put forward by Jane Mace as central to the education of people who often can read, but wish they could read better; who, technically can write, but have a desire to do so with more expression and coherence. These principles focus on five themes: context, inquiry, authorship, equality and community. Since it is all too easy for literacy education involving adults who do not have formal qualifications to stop short of teaching techniques for 'correct' writing, these principles mean taking seriously a view that adult students are writers as well as readers - that they have an entitlement to be read, as well as to read others.
